\*\*\*\* Advanced search functionality includes search by AOI, expanded AOI search radius, and expanded lease search fields

## DI LandTrac Unified Land and Exploration Suite

The LandTrac™ Suite provides the most integrated view of area activity at the mineral tract level. The LandTrac™ Suite is the first of Drillinginfo's tools allowing oil and gas professionals to quickly identify opportunities created by the unique market conditions of the 'New Oilpatch'. The Suite includes LeaseTrac™ outlines and metadata derived and updated monthly from legal descriptions in leases filed at County or Parish Courthouses and UnitTrac™ outlines and metadata drawn from regulatory filings. By incorporating these with Drillinginfo's wellbore, production, and drilling information, important insights like undrilled primary term expirations, HBP, pending expirations, and inferred assignments of land and operations can be obtained. DI has released LandTrac™ counties in hot plays in Texas, Oklahoma, and Louisiana, and is adding counties on an ongoing basis.

## DNA Knowledge and Project Management Platform

Drillinginfo Network Architecture extends the utility and functionality of DI for Managers and Executives. It is a comprehensive knowledge and workflow management tool that can be used to capture and catalog corporate knowledge, assimilate it with Drillinginfo's integrated land, well, and production data, and enable teams of professionals and techs to efficiently collaborate.

LeaseTrac, UnitTrac and LandTrac are trademarks of Drilling Info, Inc.

## Drillinginfo Packaged So Your Company Can Do More To Explore

**Open** the right Drillinginfo package **to Do More to Explore**

Now everyone in your company can have access to the power of the DI platform without breaking the bank. Save time and get more results with the DI package that makes the most sense for your business. Choose between two subscription packages, sized to your company and featured to your meet your exploration needs.

## DI Basic

DI BASIC is sized to allow your company to get the access it needs and to economically add new users. DI BASIC includes a predetermined minimum number of user licenses and steeply discounted user fees for additional users. DI BASIC allows you to start with the access to people and data sets that fits your company's needs and extend the value of Drillinginfo to everyone in your organization as you grow.

## DI Plus

For companies with a big appetite for success, Drillinginfo offers DI PLUS. It's Drillinginfo without limits. You pay one price annually for unlimited access to a single integrated platform that serves up the most current land, production, and well information for everyone.

Unlimited users, no limits on downloads, and unlimited access to all states, all LandTrac™ counties and parishes, specialty data and historical data sets, and analytical tools! We'll even train everyone in your organization to get the maximum value out of Drillinginfo.

## DI Plus Features

- **Unlimited User Access** – Allows everyone in the Company from the CEO to the techs to have full access to Drillinginfo. Unlimited access eliminates the overhead associated with managing user licenses.
- **All States Coverage** – Access to up-to-date regulatory data in 12 key states as well as historic well histories and production in 32 states and detailed well information in 26.
- **DI Log Library** – Drillinginfo has a library of more than one million logs. These logs are unique and cannot be found in any other log library. A significant number of these logs are depth registered to provide greater utility.

Members get unlimited access to these logs through the DI PLUS subscription, as well as

a free download of NeuraWellTool software application for viewing, correlating and marking up logs.

- **ODI** – Find historical production and well files from Texas, Oklahoma, New Mexico and Louisiana dating as far back as 1937.
- **Louisiana Unit Geology** - Research Louisiana geological exhibits as far back as 1950 including logs, well tests, structure maps, fault plane maps, isopach maps, cross sections, reservoir data and unit outlines.
- **Unlimited Downloads** – Search for and download, without quotas, lat/longs, permits, completions, well and production data into the format of your choice.

### Additional Features

- Shape file downloads for permits, production, completions, wells, LandTracs/UnitTracs, polygons and map grids.
- Option to display grantor/grantee address, quarter calls and record number in table view
- Map autosizing.
- Expanded AOI functions including the ability to search through AOI and set increased search distances.
- Extended searching & analytical features to determine well to well performance statistics.
